

Comenius-Project: Genetic Engineering and Biotechnology, dead end or sustainable development?

Questionnaire

1. **The contribution of genetic engineering to the solution of global problems is...**

very important important unimportant I don't know

2. **I consider the use of GMOs (Genetically Modified Organisms) to avoid environmental problems as...**

very important important unimportant I don't know

3. **To me the use of GMOs in medicine is...**

very important important unimportant I don't know

4. **In my opinion the use of GMOs in agriculture is ...**

very important important unimportant I don't know

5. **The consumer should be informed about GMOs contained in food.**

very important important unimportant I don't know

6. **Manipulation of the human genes should be forbidden.**

Yes No I don't know

7. **Using cells of unborn humans for research should be forbidden.**

Yes No I don't know

8. **Treating hereditary diseases by modifying human genes should be forbidden.**

Yes No I don't know

9. **Using genetic engineering to make humans more intelligent and more attractive is ...**

Acceptable Unacceptable I don't know
